

ATH. P. SKAYANNIS
CIVIL ENGINEER

56, Sokratus street
Athens 26-7.50

Prof. Dr. Ing. Mustafa Inan

Istanbul

Dear Professor,

I have much pleasure in forwarding to your address, under separate cover, by ordinary mail, one booklet of my own work.

My own opinion, to the effect, that my work, is to be very useful, in the practice, giving at the same time, a general and quick solution, on the problem of continuous Beam, is being shared with the opinion of various Professors Greeks, Italian as well as by the German of Munich Professor Dr. L.A. FOPPL.

I shall be much obliged to you, if you were kind enough, after perusal of same, you would kindly give me your invaluable expert opinion, also of your Confreres specialising on Concrete Works, and Statics.

I think it superfluous adding that your critic with any remarks you may have to make, will be wellcome and highly appreciated by me.

Thanking you in anticipation, and with the expression of my highest esteem in you,

I beg to remain,

Yours very Truly,

APSKAYANNIS
